

2024 Imagine Outcomes Data

Average LOS: 106 Days

Program Completion Rate: 79% (89% if including those that returned to us after RTC)

*53% of those that did not complete treatment were referred to RTC

*88% of those referred to RTC returned to Imagine after completing RTC

of reported returns to use during programming:

62% - 0 lapses

18% - 1 lapse

10% - 2 lapses

10% - 3+ lapses

Beck Depression Inventory (BDI)

Average BDI upon admit: 22.7 – Moderate Depression

Average BDI upon discharge: 7 – Normal ups and downs of life, non-clinical

Average BDI Change: **↓16.3**

**A 16.3 point decrease is enough to take someone from “severe depression” to a “mild mood disturbance.”*

Beck Anxiety Inventory (BAI)

Average BAI upon admit: 18.8 – Low Anxiety

Average BAI upon discharge: 8.7 – Very Low Anxiety

Average BAI Change: **↓11.5**

**A 11.5 point decrease is enough to take someone from “severe anxiety” to “moderate anxiety” or “moderate anxiety” to “very low anxiety.”*

Posttraumatic Stress Disorder Checklist (PCL-5)

Average PCL-5 upon admit: 16.2 – Suggestive of difficulties with PTSD

Average PCL-5 upon discharge: 11.4 – Does not suggest difficulties with PTSD

Average PCL-5 Change: **↓4.7**

**82% of clients admit with a PCL-5 score ≥ 14 , which suggests difficulties with PTSD. Only 18% of clients discharge with a PCL-5 score suggestive of difficulties with PTSD.*

Treatment Effectiveness Assessment (TEA)

Average TEA upon admit: 24.5

Average TEA upon discharge: 34.7

Average TEA Change: **↑10**

***The TEA directly assesses clients’ perspectives on their substance use, personal health, lifestyle and responsibility to the community. The total score is the sum of the responses to the four TEA domains, ranging from 4 (no measurable improvement or worse) to 40 (significantly improved), based on the changes that have taken place since entering the treatment program.*

Additional factors to consider:

- The data include outliers (e.g., clients who admit and then no show, clients who attend less than a week of programming, clients that demonstrate need for a higher LOC post-admit).
- All assessments are self-reported measures conducted upon admit, midpoint, and discharge.
